

**Redemptoris Mater Seminary Addition  
Larson-Incitti Architects  
Denver, Colorado  
Completed: 2008**

Expansion of the seminary Planned Building Group involved a 14,000 square foot expansion to the exiting facility. Creative Civil Solutions provided site design and planning documents supporting inclusion of the addition into the existing site without additional regional detention modifications. Site design included grading, utilities and demolition and drainage analysis and design.

**Flatirons Community Church  
Moore & Bishton Architects  
Skiffington Architects  
Lafayette, Colorado  
Completed: 2005**

Concept planning for a Mega-Church of 10,000+ members required a thorough investigation of the site to ensure church expansions would be possible for future growth and facility needs. Creative Civil Solutions analyzed this 25-acre church site for feasibility of future expansions onto adjacent parcels. Designs included analysis of multiple roadway re-alignments of Emma Street, site construction requirement, additional land feasibility studies, potential natural gas well buyout, site and City records investigation and infrastructure cost analysis prior to project capital fund raising and design of the new church facility.
